EDUCATION

NATIONAL UNIVERSITY OF COMPUTER AND EMERGING SCIENCES (NUCES - FAST) | Islamabad, Pakistan

BS in Data Science | Aug 2023 - May 2027 | CGPA: 3.84/4.0 | Rank 1/150 | Major: Data Science

- Gold Medal - Fall '24 & Spring '25 | Silver Medal - Fall '23 & Spring '26 | Bronze Medal - Fall '25 | Dean's List: All Semesters
- Relevant Coursework: Artificial Intelligence, Intro to Data Science, Database Systems, Advanced Statistics, Data Mining, Data Warehousing & Business Intelligence, Deep Learning, Design & Analysis of Algorithms, NLP

WORK EXPERIENCE

Researcher Assistant, Zayed University | July 2026 - Present

- Collaborate with researchers from Zayed University and University of Adelaide under the supervision of Dr. Faheem Ullah on AI and machine learning research projects, notably on natural hazards and cybersecurity applications.

Undergraduate Researcher, NUCES - FAST

Computer Vision & Deep Learning | Jan 2025 - Present

- Conduct research on efficient deep learning, designing lightweight CNN architectures for real-world AI applications, including Alzheimer's Disease Classification and Speech Emotion Recognition.

Data Annotator, Turing | June 2025 - Aug 2025

- Contributed to Claude (Anthropic) by producing and optimizing high-quality training data, including content summarization, fact verification, and reasoning-intensive tasks.
- Ensured accuracy and quality through rigorous evaluation while developing expertise in analytical reasoning and high-precision AI data workflows.

Teaching Assistant / Lab Demonstrator, NUCES - FAST

OOP Lab (Fall'24) | PF Lab (Spring'25) | IDS Lab (Fall'25) | PF Theory (Fall'25) | OOP Lab (Spring'26)

- Mentored Programming Fundamentals students and assisted with quizzes, assignments, grading, and project supervision
- Guided 60+ undergraduates in lab sessions, providing hands-on support and debugging assistance in C++, OOP, and Python.

PROJECTS

Case Study: Energy Consumption in London (Python)

- Predicted energy consumption using 3.5M+ smart meter records, leveraging demographic, weather, and temporal features.
- Engineered features to reduce the dataset to 15,000 representative records and evaluated multiple regression models, with tree-based methods achieving the best performance.

Near-Real-Time Data Warehouse for Walmart using HYBRIDJOIN, NUCES - FAST

- Designed and implemented a near-real-time Walmart Data Warehouse prototype using customer, product, and transaction data with a star schema for multidimensional analysis.
- Implemented the HYBRIDJOIN algorithm in Python for efficient stream processing and near-real-time joins using hash tables, queues, disk buffers, and ETL workflows.
