EDUCATION

NATIONAL UNIVERSITY OF COMPUTER AND EMERGING SCIENCES (NUCES - FAST) | Islamabad, Pakistan

BS in Data Science | Aug 2023 – May 2027 | **CGPA: 3.80/4.0**

Major: Data Science

- Gold Medal (3rd Semester - 2025): Highest GPA in a batch of 150 students
- Silver Medal (1st Semester - 2023): 2nd highest GPA in batch
- Dean's List: Fall 2023, Spring 2024, Fall 2024
- Relevant Coursework: Data Structures, Intro to Data Science, Database Systems, Advanced Statistics, Software Engineering, Computer Org & Assembly

Bahria College Islamabad | Islamabad, Pakistan

Cambridge A-Level | Graduated June 2023 | **GPA: 4.0/4.0**

- 100% Merit Scholarship for Top O-Level Result (2021)
- Grades: Math: A, Physics: A, Chemistry: A, Computer Science: A

Cambridge O-Level | **GPA: 4.0/4.0**

- Grades: 8 A*s, 1 A (incl. Math, CS, Add Math, Physics, Chemistry)

WORK EXPERIENCE

Teaching Assistant (Lab Demonstrator), NUCES - FAST

Programming Fundamentals | January 2025 - Present

Object Oriented Programming | August 2024 - August 2025

- Provided one-on-one and group assistance to over 60 undergraduate students, clarifying programming concepts and debugging issues in C++ and OOP lab assignments.
- Collaborated with course instructors to design lab exercises and reinforce core programming principles through hands-on demonstrations.
- Recognized as one of the few students selected from the youngest batch to serve as a lab demonstrator, reflecting strong academic standing and leadership skills.

Research Assistant, NUCES - FAST

Computer Vision & Deep Learning | January 2025 - Present

- Selected as one of only five students across the batch for a competitive research position based on top performance in a relevant course.
- Currently building a strong foundation in core concepts and methodologies of computer vision and deep learning under the mentorship of a faculty member.
- Preparing to contribute to ongoing research projects by studying recent advancements, analyzing scholarly articles, and exploring model architectures and datasets.

Education Outreach Volunteer, Pehli Kiran Schools | Islamabad, Pakistan | 03/05/2025 - present

- Assist in delivering foundational academic support in literacy and numeracy to underserved children in informal school settings.
- Work closely with students to build confidence in learning and promote consistent educational engagement in line with SDG 4 (Quality Education).

PROJECTS

Case Study: Energy Consumption in London (Implemented with Python)

- Predicted energy usage patterns using demographic, weather, and time-based data from the Smart Meters in London dataset (3.5M+ records).

- Performed data cleaning and feature engineering to condense the dataset into 15,000 representative entries for efficient modeling.
- Evaluated multiple models (Linear & Penalized Regression, Decision Tree, Random Forest, Gradient Boosting), with tree-based approaches significantly outperforming classical methods.

Game Developer, NUCES - FAST

Retro Snake Game | Fall 2023

Retro Brick Breaker Game | Spring 2024

- Designed and implemented two retro-style games in C++ using the GLUT library, focusing on smooth gameplay, nostalgic visuals, and responsive controls.
- Built core mechanics including movement, collision detection, ball dynamics, and scoring, applying strong object-oriented programming principles.
- Both projects received top marks, showcasing technical proficiency, creativity, and attention to user experience.
